Corrigendum

Corrigendum to "Quantification of smokeless powder (SLP) additives on hands after direct handling of bulk samples via a filter-and-shoot method" [Sci. Justice (2025) 101262]

Troy Standley [a], Carissa Putruele [a], Gwladys Lambert [a], Corin Kelly [a], Jana Liechti [a], Zara Redshaw [a], Nadia T. Stephaniuk [a], Nathalie Mai [b], Matteo D. Gallidabino [a,*]

The authors regret that the caption for **Fig. 5** in the published version of the article was incorrect. The correct caption should read:

"Figure 5 – Transfer efficiencies (f_T) for the three additives plotted against the total mass of SLP handled (M_{SLP}), based on data pooled across the different combinations of handler (H_{ID}) and SLP type (T_{SLP}). Error bars represent the standard deviations of the measured values. The solid red lines represent the mean trendlines, while the dashed red lines indicate the respective 95 % confidence intervals (CIs). The trendlines were derived from log-log regression models, which were identified as the best fit among the models tested (see Table S5)."

The authors would like to apologise for any inconvenience caused.
